EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Alan K. Aldous on

The application has been amended as follows:

Claim 3 (currently amended). The system of claim 1, wherein the mirroring circuitry includes demodulator circuitry to create a signal representative of frequency changes in the spread spectrum data signal.

Claim 6 (currently amended). The system of claim 1, wherein the mirroring circuitry includes an RF mixer to frequency modulate the reference clock signal and a signal representative of frequency changes in the spread spectrum data signal.

Claim 21 (currently amended). The system of claim 19, wherein the mirroring circuitry includes demodulator circuitry to create a signal representative of frequency changes in the spread spectrum data signal.

EXAMINER'S STATEMENTS OF REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: Claims 1, 3-12, 14-19, 21-23, 25, and 26, which have been renumbered claims 1-21 are allowable over prior art references because related references do not disclose a clock recovery system receiving a spread spectrum signal including a receiving gate to receive a data signal and an in phase clock signal and to gate the data signal to produce a gated data signal in response to the in phase clock signal, a phase detector to receive the gated data signal and in response thereto to produce a phase information signal, mirroring circuitry to receive the gated data signal and the reference clock signal and in response thereto to produce a frequency mirrored clock signal that mirrors frequency changes in the data signal, and a phase interpolator to receive the phase information signal and the frequency mirrored and in response thereto to produce the in phase clock signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
